The Naked Watchmaker
Breguet is a luxury watch, clock and jewelry manufacturer founded by Abraham-Louis Breguet in Paris, France in 1775. Since 1999, it has been a subsidiary of the Swiss Swatch Group. Headquartered in L'Abbaye, Switzerland, Breguet is one of the oldest surviving watchmaking brands and a pioneer of numerous watchmaking technologies such as the tourbillon, which was invented by Abraham Breguet in 1801. Abraham Breguet also invented and produced the world's first self-winding watch in 1780, as well as

Founded in 1775 by Abraham-Louis Breguet, the firm of Breguet has occupied a unique position in the field of prestige watchmaking. Considered the greatest watchmaker of all time, Abraham-Louis Breguet was the father of modern watchmaking, an innovator in both the technical and aesthetic fields. A work of reference containing a wealth of previously unpublished information, this is also a sumptuous art book, distinguished by the elegance of its design and the excellence of its illustrations. In addition, the author skillfully combines the histories of art, technical developments, politics and economics to create an appealing and accessible narrative. Over 500 illustrations present a visual history of the principal creations produced by the Breguet workshops over the last two hundred and twenty years. Many of the pieces illustrated are held in private collections and are photographed here for the first time.

This dazzling exploration of the work of renowned horologist Breguet is also a fascinating look at what makes watches and other timepieces tick. Abraham-Louis Breguet invented many of the standard components of today's most prestigious watches, earning the title "The Father of Modern Horology." The self-winding watch, the gong spring, the first shock-protection device, and the enameled dial--all were created by Breguet. In addition, he invented the first travel clock, sold to Napoleon Bonaparte in 1798, and the first wristwatch, delivered to Caroline Murat, queen of Naples in 1812. Perhaps Breguet's most famous timepiece is the "Marie-Antoinette" pocket watch, which took forty years to make and was the most complex watch of its time. This fascinating, elegantly designed volume features more than seventy watches and clocks that were constructed by the Breguet company, and it contains many insights into the inner workings that made these objects so innovative and valuable. Engaging essays explore Breguet's personal history, the technologies he perfected, and his vast international reputation--which survives to this day. This beautiful overview of Breguet's achievements will speak to anyone who treasures their watch--whether as an indispensable daily accessory, or as a prized piece of jewelry.

The Marine Chronometers at Greenwich is the fifth, and largest, of the distinguished series of catalogues of instruments in the collections of the National Maritime Museum. Housed at the Royal Observatory Greenwich -- the 'home of time' and the Prime Meridian of the world -- this extraordinary collection, which includes the celebrated marine timekeepers by John Harrison (1693-1776), is generally considered to be the finest of its kind in existence. The book is however much more than just a catalogue, and includes an accessible and engaging history of the chronometer, revealing why these instruments were important in our scientific and cultural history, and explaining, in simple terms, how they worked and were used. A comprehensive Glossary and Bibliography are included to ensure any technicalities are explained and that the reader has suggestions for useful 'further reading'. Over 480 photographs and illustrations, including many fine macro-photographs and line drawings, illustrate the 'jewel-like' beauty of the chronometer's construction and explain the function and subtleties of its mechanism. A chapter on 'How the Chronometer was Made', describes the fine sub-division of labour used to create these special machines, from bare metal, right up to delivery on board ship, and brief biographies of the makers tell the human story behind this important nineteenth-century industry. Another chapter, 'The Evolution of the Chronometer', aimed at collectors, historians and curators, provides clearly structured information on assessing and dating the chronometer, something many find difficult. And, for the dedicated specialist, there is extensive tabulated data on the technical structure of this important collection, a unique resource for future research.

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. We have represented this book in the same form as it was first published. Hence any marks seen are left intentionally to preserve its true nature.

The third edition of this definitive and popular book, marking the 60th anniversary of the Speedmaster Now includes 17 new Speedmasters and an additional 120 new illustrations Updated models, serial range, and popularity index make this a must-buy for collectors "Moonwatch Only is certainly one of the best books ever written about a single watch model." - William Massena - Timezone.com "It is an indescribable reference work and a true must-have for every Speedmaster collector." - Forbes "This book sets a new standard. Not only for books on the Omega Speedmaster, but for watch books in general. I've never seen anything like it, and believe me when I tell you that I could fill an impressive sized wall with books on watches. Authors of other books or publishers should take a look at Moonwatch Only as well to see how it should be done." - Robert Jan Broer - FratelloWatches "The OMEGA Speedmaster Professional - the Moonwatch - has done things that no other timepiece has done and it's been worn in places that only a few human beings have been." - Captain Eugene Cernan, 'Last man on the moon' There are very few timepieces in the world that deserve a definitive and comprehensive book such as this one. The OMEGA Speedmaster Professional Moonwatch is one of them. Initially designed for automobile racing teams and engineers, the Omega Speedmaster embarked on a very different trajectory when NASA chose it to accompany astronauts heading for the Moon in 1965. Its involvement in the space adventure has propelled the Moonwatch to the top of the list of celebrated timepieces. After years of research and observation, the authors present a complete panorama of the Moonwatch in a systematic work that is both technical and attractive, making it the inescapable reference book for this legendary watch. This third edition marking the 60th anniversary of the Speedmaster has been enriched with numerous new features including a 16-page gallery of astronauts and their Speedmaster, QR codes to extend your exploration and a detailed story of a vintage Speedmaster.

Mark Fenton, television personality and author of the best-selling Complete Guide to Walking, teams up with top exercise researcher, David R. Bassett, to help readers get moving. These guys know what works, and they've got pedometers on the brain. During the last ten years, pedometer use has grown exponentially. "Step counting" broke into the exercise vocabulary when Oprah started sporting her own pedometer, and the mania has only grown. Ten years ago there were five pedometers on the market; today there are dozens. But what to do with them? Hearing the cries for solid information, authors David R. Bassett and Mark Fenton have stepped up. Covered in this guide are a history of step counting--Jefferson was a fan, and a pedometer was designed by Leonardo da Vinci--advice on choosing a pedometer, and a guide to starting a pedometer program, with looks at successful ones in the U.S., Australia, and Europe. Most important may be the chapters treating the tremendously successful 10,000-steps-per-day programs initiated in Japan, as well as the modifications it needs to work for children and senior citizens. Aside from the pedometer itself, Pedometer Walking may be one of the most important exercise tools in years.

Among the finest examples of European craftsmanship are the clocks produced for the luxury trade in the eighteenth century. The J. Paul Getty Museum is fortunate to have in its decorative arts collection twenty clocks dating from around 1680 to 1798: eighteen produced in France and two in Germany. They demonstrate the extraordinary workmanship that went into both the design and execution of the cases and the intricate movements by which the clocks operated. In this handsome volume, each clock is pictured and discussed in detail, and each movement diagrammed and described. In addition, biographies of the clockmakers and enamellers are included, as are indexes of the names of the makers, previous owners, and locations.
