of money for the potential to earn substantial profits. This sort of investment, however, is considered high risk. When prices are not in an investor's favor, he can suffer substantial losses.

Commodities that are open to this type of investing include cotton, soybean, and rice. In some countries, although these commodities are available, this type of trading is illegal.

What are Commodity Derivatives?
(with picture)

Commodity Derivatives are the commodity futures and commodity swaps that use the price and volatility of price in underlying as the base to change in prices of the derivatives so as to amplify, hedge, or invert the way in which
