## **Temple Architecture In**

Temple architecture of high standard developed in almost all regions during ancient India. The distinct architectural style of temple construction in different parts was a result of geographical, climatic, ethnic, racial, historical and linguistic diversities. Ancient Indian temples are classified in three broad types.

## **Hindu temple architecture - Wikipedia**

Evolution of Temple Architecture  
in India during Gupta Period:

During the Gupta period, a firm foundation of temple architecture was laid when the basic elements of the Indian temple consisting of a square sanctum and pillared porch emerged.

## **Evolution of Hindu Temple Architecture**

In Gupta architecture, the square was considered the most perfect form and temples were designed to be appreciated from all sides so that each carries decorative architectural features. Most temples also adopt a square plan with the single cubicle garbhagriha in the centre.

# File Type PDF Development Of Temple Architecture In India With Reference To **Gupta Architecture - Ancient History Encyclopedia**

Early temples consisted of only a garbhagriha, but over time additions were built and copied across temple sites to create, by the 10th century CE, a canonical architectural style. The most obvious of these features were a portico entrance ( ardhmandapa ) and pillared hall ( mandapa ) which led to the garbhagriha - features which developed in the Deccan from the 8th century CE.
