Teachers of Chinese as a foreign language in many international contexts are searching for pedagogic solutions to promote effective learning. Models of innovative and successful approaches are urgently needed. This volume presents a collection of compelling and empirically rich research studies that showcases innovative developments in the practice of teaching Chinese as a foreign language. The studies focus on three interrelated areas: learners, teachers, and applications of new technologies. Specifically, the

Online Library Exploring Innovation

studies explore methods for fostering learner-centred classrooms, autonomous learners, intercultural learning, the role of teacher views and identities, the nature of a 'middle ground' approach, and technologies that accommodate the unique aspects of the Chinese language, with new options for mobile and interactive learners. Providing both inspiration and practical models for language practitioners and researchers, it offers a vital resource for teachers' professional development, and for pre-service teacher education.

Under the guidance of Moeran and Christensen, the authors in this volume examine evaluative practices in the creative industries by exploring the processes surrounding the conception, design, manufacture, appraisal and use of creative goods. They describe the editorial choices made by different participants in a 'creative world',

Online Library Exploring Innovation

as they go about conceiving, composing or designing, performing or making, selling and assessing a range of cultural products. The study draws upon ethnographically rich case studies from companies as varied as Bang and Olufsen, Hugo Boss and Lonely Planet, in order to reveal the broad range of factors guiding and inhibiting creative processes. Some of these constraints are material and technical; others are social or defined by aesthetic norms. The authors explore how these various constraints affect creative work, and how ultimately they contribute to the development of creativity.

'Birgitte Andersen revisits in a modern context the ideas of Kuznets on technological growth paths, but emphasises the structural variety in patenting where earlier authors focused on aggregate trends. This is an important contribution for scholars interested in the interface

between the recent history of technology and evolutionary economics.' - John Cantwell, Rutgers University, US

This book explores the concept of relational care, what it feels like for older people and for carers, why it makes life happier and how those involved in residential or community care can make it work. Relational care is gaining traction as its benefits to individuals and society become recognised. This accessible book, based on real-life models and in-depth interviews, explores fresh ways that relational care can be facilitated in a variety of settings. It looks at practice in terms of team management, support for care workers, technology, design and architecture, intergenerational and multidisciplinary models, and their implications for resilience, wellbeing, policy and future funding. Chapters are arranged by theme and provide

Online Library Exploring Innovation

descriptions, learning points and resources for each model, as well as incorporating a wealth of interviews giving insights into the lived experience of relational care. This is a lively book full of realistic ideas and information for everyone who wants to find out more about, access or implement the best in care – the best for older people, their families, care workers, management and society.

Alexander Brem presents a comprehensive overview of the theoretical background and recent models in the context of innovation and entrepreneurship. Based on a process-oriented innovation-entrepreneurship framework, the author investigates the integration of market pull and technology push activities in the innovation process.

Online Library Exploring Innovation

Innovation is occurring at a rapid pace in digital work and demands increasing attention from academic scholars. In line with this demand, this book aims to provide an overview of recent advances in studies of innovation and technology in the digital space. The book addresses the cultural elements influencing the diffusion and adoption of digital technologies, the pervasive role of social media, the organizational challenges of digital transformations, and finally specific emerging technologies such as artificial intelligence and distributed ledger technology. The plurality of views offered makes this book particularly relevant to practitioners, academics, and policymakers, and provides an up-to-date view of the latest developments in Information Systems. It gathers a selection of the best papers (double-blind peer-reviewed) presented at the annual conference of the Italian AIS Chapter in October 2020 in Pescara,
