~~Geopolitics: The Geography of  
International Relations~~

Geopolitics is the study of the influences of geographical factors in politics and the relationships between different political actors, particularly sovereign states, as

# Acces PDF Geopolitics The Geography Of International

well as de-facto states and subnational geopolitical entities. Within the context of international relations, geopolitics provides a framework for studying foreign policy, as well as for explaining and predicting the behaviors of international political actors based on geographical variables.

Geopolitics is the study of the effects of  
Earth's geography on politics and  
international relations. While geopolitics

# Acces PDF Geopolitics The Geography Of International

usually refers to countries and relations between them, it may also focus on two other kinds of states: de facto independent states with limited international recognition and relations between sub-national geopolitical entities, such as the federated states that make up a federation, confederation or a quasi-federal system.

This volume examines geopolitics by looking at the interaction between geography, strategy and history. This book addresses three interrelated questions: why does the geographical scope of political objectives and subsequent strategy of states change? How do these changes occur? Over what period of time do these
