Hunter Ed
roots in local
history. Drawing on
data collected
during his fieldwork
among the Bisa
continuing since the
1960s, Stuart
Marks describes
the changes that
have occurred in
hunting patterns,
the sociological
variables that
govern an

Access Free Large Mammals

Hunter's decision to become a hunter, and the common cosmological convictions that hunters bring to their profession. Available for the first time in paperback, the new introduction and afterword to this edition reflect on methodological and

Access Free Large Mammals

ideological changes
in the
anthropological
study of African
peoples as well as
updating the
circumstances of
the Bisa people
since the book's
first appearance in
1976. Through the
interventions of the
larger national
society the Bisa

Access Free Large Mammals

have lost much of their land and access to important portions of their resources while experiencing repression in their struggles to maintain livelihoods with what local assets are left. Nevertheless, Marks notes that they face their

Access Free Large Mammals

Hardships with tolerance, integrity, persistence, and humility. The general reader, as well as prehistorians and anthropologists concerned with human evolution and hunting societies, will find this volume useful. It will also be of

Access Free Large Mammals interest to wildlife managers and ecologists.

This review
addresses the
current
management of
larger mammalian
carnivores to
increase, maintain,
or reduce their

Access Free Large Mammals

Numbers, while taking into account the population of certain ungulate prey and their relation to predators, social pressures and attitudes of the public towards predators, and the effects of sport hunting and trapping on

and sociology writ
large.

The fascinating
lives and puzzling
demise of some of
the largest animals
on earth. Until a
few thousand years
ago, creatures that

Access Free Large Mammals

could have been from a sci-fi thriller—including gorilla-sized lemurs, 500-pound birds, and crocodiles that weighed a ton or more—roamed the earth. These great beasts, or “ megafauna, ” lived on every habitable continent and on

Access Free Large Mammals

Hunter-Eat

many islands. With a handful of exceptions, all are now gone. What caused the disappearance of these prehistoric behemoths? No one event can be pinpointed as a specific cause, but several factors may have played a role. Paleomammalogist

Access Free Large Mammals

Ross D. E. MacPhee explores them all, examining the leading extinction theories, weighing the evidence, and presenting his own conclusions. He shows how theories of human overhunting and catastrophic climate change fail to account for critical

Access Free Large Mammals

features of these extinctions, and how new thinking is needed to elucidate these mysterious losses. Along the way, we learn how time is determined in earth history; how DNA is used to explain the genomics and phylogenetic history of

Access Free Large Mammals

megafauna—and how synthetic biology and genetic engineering may be able to reintroduce these giants of the past. Until then, gorgeous four-color illustrations by Peter Schouten recreate these megabeasts here in vivid detail.

Access Free Large Mammals

Hunter Ed is the classic treatise on hunting, written by Spain's leading philosopher of the 20th century. Reprinted with permission from Scribner, this edition features handsome new illustrations. The author explains the reason why humans hunt, as well as the

Access Free Large Mammals Hunter-Ethics of Hunting.

Challenging many sacrosanct notions about the relationship between Native Americans and nature, the author discusses the possible role of Pleistocene-era humans in eradicating the

Access Free Large Mammals

mastodon, over-irrigation of crops among the Hohokam of Arizona, and slash-and-burn farming techniques. Reprint. 10,000 first printing.

Introduces the many animal species that became extinct over the past five centuries

Access Free Large Mammals

as the result of
European expansion
into various parts of
the world, including
the great auk,
Carolina parakeet,
thylacine, and
passenger pigeon.
