for night photography are a tripod and remote shutter release. Some other helpful items are a flashlight, a lens hood, and an extra battery. For exposure, start with moderate ISO (around 400) and aperture (around f/5.6-8) and see where that puts your shutter speed.

## The Ultimate Guide to Night Photography

The truth is that your night time photography will have long exposures anyway and you'll be shooting on a tripod for stability. Lower ISO settings will give you much less digital noise, especially in the dark shadow areas of your photo, which night photos usually have a lot of. Set your ISO for somewhere between ISO 100 and ISO 800.

## Night Photography Tips for Beginners (with Examples ...

You need a few bits and bobs to do a good job with night photography. A fast lens, for one thing: you ' re looking to get as much light as possible through the lens, which means  $f/2.8$  is more of a maximum aperture than a minimum. A tripod is another: something solid and stable that won ' t blow around in the wind.
